Comment Suggestion

I am an independent student coming back after 30 years to complete my undergraduate degree. I tried taking this class with Professor [REDACTED] and it was too much and I was not able to understand the material and [REDACTED] teaching style was not conducive for me. I dropped the class. I came back this year and saw that Professor Brumberg was teaching it - she shared that her teaching style was different and that she was confident that the course may be more manageable and she was 100% CORRECT! She was able to break down complicated concepts into simple steps that if followed, getting the correct answer would prove satisfactory. For any students having to take a require STAT class, I would 100% share that she would be my FIRST CHOICE as the professor. I am still amazed that I got a B+ in the class after all these years. It definitely speaks to my hard work in the class and the professor who taught the class. THANK YOU PROFESSOR BRUMBERG for a really good summer at UPENN experience. In addition - it is PRETTY DAMN COOL that she co-authored the textbook too!!!

Although the course is quick-paced, the instructor is very understanding and explains concepts thoroughly.

I really enjoyed the pace of the course because it was still intensive, but doable for people over the summer!

Great course, even better professor. Felt really supported in my learning, and the professor really estimulated my interest on the topic and helped me understand and apply all concepts.
